

Praju Kumar | Full Stack & Mobile Developer

📍Montgomery, AL 📞+1 (334) 669-7423 ✉️prajukumar081@gmail.com [in](#) [LinkedIn](#) [GitHub](#)

SUMMARY

Full Stack & Mobile Developer with 4+ years of experience delivering cross-platform apps for iOS, Android, and Web. Skilled in **Kotlin, Swift/SwiftUI, React Native, Flutter, Firebase, React.js, Next.js, Angular, TypeScript, and JavaScript**. Experienced with **Spring Boot, Node.js, REST, GraphQL, PostgreSQL, MongoDB**, and **cloud/CI-CD tools** (AWS, Vercel, Jenkins, GitHub Actions, Docker, Bitrise). Proven ability to implement **secure integrations (OAuth 2.0, Stripe)**, manage **App Store & Play Store deployments**, and drive **Agile, user-focused digital transformation projects** that improve speed, stability, and retention.

SKILLS

Mobile Development: Kotlin, Swift, SwiftUI, HealthKit, Firebase, Espresso, XCTest, Flutter, React Native, Jetpack Compose, HealthKit, Push Notifications, Deep Linking, Firebase Crashlytics

Web Development: React.js, Angular, TypeScript, JavaScript, HTML5, CSS3, Playwright, Jest, Next.js, Redux Toolkit, GraphQL, Tailwind CSS, Material UI, Jest, Playwright, CSS3, Apollo

Backend & APIs: Spring Boot (Java), Node.js, Express.js, RESTful APIs, Microservices, PostgreSQL, MongoDB, GraphQL APIs, WebSockets, Firebase Functions, OAuth 2.0, Secure Storage

Cloud & DevOps: Vercel, Docker, Jenkins, GitHub Actions, CI/CD Pipelines, TestFlight, Google Play Console, Bitrise, AWS S3

Tools & Practices: Git, Agile (Scrum/Kanban), UI/UX Collaboration, Stripe Integration, Automated Testing, Jira, Confluence

EXPERIENCE

Brainvire Infotech Inc

Aug 2024 – Current

Full Stack Developer

Remote, USA

- Designed and developed a **cross-platform e-commerce solution** by building Android applications with **Kotlin** and responsive web interfaces with **Angular & TypeScript**, enabling seamless multi-device shopping experiences.
- Engineered **RESTful backend APIs using Spring Boot and PostgreSQL**, applying database indexing and query optimization that **reduced response times by 35%** during peak loads of 500+ concurrent sessions.
- Integrated **Stripe payment gateway** for secure transactions and **Firebase Cloud Messaging** for real-time order updates, resulting in an **18% decrease in cart abandonment** during user testing.
- Deployed applications across platforms by publishing the Android app on the **Google Play Store** and hosting the web platform on **Vercel**, achieving an **average page load time of 1.2s** and ensuring smooth performance across devices.
- Implemented **CI/CD pipelines with Jenkins** and containerized microservices using **Docker**, which **reduced deployment overhead by 40%** and improved release frequency.
- Strengthened application reliability by conducting **instrumentation tests with Espresso** and **end-to-end tests with Playwright**, achieving a **95% automated test pass rate** in continuous integration workflows.

Capgemini

Mar 2020 – Jul 2023

Software Developer

India

- Spearheaded the development of **SmartHealth Tracker**, a cross-platform wellness application, by building **iOS features in Swift/SwiftUI** and **web modules in React.js**, delivering a seamless user experience for digital transformation goals.
- Engineered and optimized **backend microservices using Node.js/Express with MongoDB Atlas**, applying query tuning and caching strategies that **improved API response times by 28%**, enabled smooth performance for **100+ concurrent beta testers**.
- Integrated **Apple HealthKit API** to capture and sync fitness and nutrition data in real time, achieving **95% cross-device synchronization accuracy** and enhancing compliance with healthcare data standards.
- Managed application deployment by distributing the **iOS app via TestFlight** and deploying the web platform on **AWS S3 with CloudFront**, reaching **100+ pilot users** and achieving a **90% user retention rate in the first month**.
- Automated release processes by designing **GitHub Actions CI/CD pipelines** that integrated build, test, and deployment stages, reducing release cycles from **2 days to under 6 hours** and accelerating client feedback integration.
- Strengthened product quality by implementing **comprehensive automated testing suites** using XCTest for iOS and Jest for web, reaching **92% code coverage** and reducing regression defects by **30% pre-launch**.
- Collaborated closely with UI/UX designers, QA engineers in **Agile (Kanban) sprints**, refining requirements, addressing production issues, and delivering **client-ready solutions that met performance and compliance standards**.

EDUCATION & CERTIFICATIONS

Masters of Science in Computer Science

Aug 2023 – May 2025

Auburn University at Montgomery

Alabama

- Legacy JavaScript Algorithms and Data Structures
- React Native -The Practical Guide
- Agile Project Management: Agile, Scrum, Kanban & XP
